About: [Video: Artistic Approach and Exhibition 2024](#)

Born 1969, Neuss, Germany

Artist Statement (Short)

My artistic work as a visionary artist explores hidden dimensions of consciousness and the unseen structures of reality. I understand art as a bridge between the visible and the invisible – creating spaces to explore the unknown. My paintings and public art formats function as experiential fields that invite healing, spirituality, and transformation.

Artistic Practice | Focus

Visionary painting, intuitive geometry, and art as a field of spirituality and expanded consciousness. Development of large-format meditation and transformation paintings for public and private spaces since 2022. Public art performances as temporary immersive (healing) fields across Europe. Artistic practice interwoven with my healing profession.
